### EXAMINER'S AMENDMENT/COMMENTS

An examiner's amendment/comments to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

#### *Election/Restrictions*

Claims 1-5 and 23-27 are generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 1-5 and 23-27, directed to the species of Embodiment Mode 1 (figures 1A-1C) are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim. However, claims 45-65, directed to the species of Embodiment Mode 3 (figures 3A-4C) remain withdrawn from consideration since they do not depend upon or otherwise include all the limitations of an allowed generic claim as required by 37 CFR 1.141.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Authorization for this examiner's amendment was given in a telephone interview with Jeffrey L. Costellia on 12/5/05.

The application has been amended as follows:

In claim 1, line 6, after "a noble gas element is" insert "selectively".

Please cancel non-elected claims 45-65.

## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The closest prior art of record, Makita et al., US Patent 5,821,562 alone or in combination of Makita et al., US Patent 5,821,562 in view of Henley et al., US Patent 6,083,324, fails to show the following steps:

Pertaining to independent claims 1, 6, 12 and 17, "forming an impurity region to which a noble gas element is selectively added in the crystalline semiconductor film;"

Pertaining to independent claims 23, 28, 34 and 39, "forming a mask insulating film having an opening on the crystalline semiconductor film; forming an impurity to which an ion of a noble gas element accelerated by an electric field is added in the crystalline semiconductor film through the opening;" On page 3, lines 27-28, the Applicant has defined selectively adding a noble gas element as using a mask insulating film having an opening.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

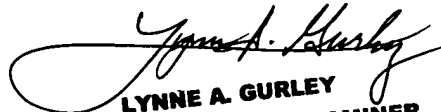

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stanetta D. Isaac whose telephone number is 571-272-1671. The examiner can normally be reached on Monday-Friday 9:30am -6:30pm.
